Dear Hiring Manager,

I am writing to express my interest in the Full Stack Developer position. I hold a Bachelor of Technology in Computer Science and Engineering from Biju Patnaik University of Technology (BPUT), Odisha, where I developed strong software development skills through rigorous academic coursework and hands-on practical projects.

During my studies, I gained proficiency in Java, SQL, Full Stack Web Development, and Data Structures, building a solid foundation in problem-solving and software engineering principles. One of my key projects is a Food Ordering Application, where I designed and developed a complete, end-to-end system that allows users to browse menus, place orders, and manage food deliveries efficiently. Working on this project involved building user-friendly interfaces, robust backend functionalities, and seamless database integration to ensure smooth order processing and reliable performance. This experience greatly strengthened my skills in full-stack development, database management, and creating scalable, real-world software solutions.

I am confident that my technical abilities, eagerness to learn, and commitment to delivering high-quality software make me a strong fit for your team. I am available to start within a minimum notice period of 7 days and would welcome the opportunity to discuss how my background and problem-solving mindset can contribute to your impactful product development.

Thank you for considering my application. I look forward to the opportunity to interview and learn more about this position.

Sincerely,

Dhruv Kumar Maharana
