SUMMARY

Computer Science undergraduate specializing in Java full-stack development with hands-on experience in building web applications and machine learning solutions. Proficient in Java, SQL, and backend integration, with a focus on clean code and performance optimization. Proven ability to lead projects, deliver measurable results, and leverage AI tools to enhance development efficiency.

WORK EXPERIENCE

WEB DEVELOPER INTERN | MSC HIRETECH

June 2024 - Jan 2025

- o Gained hands-on experience in web development technologies including HTML, CSS, JavaScript, and backend integration.
- o Independently developed and deployed a fully functional news broadcasting website as part of a freelance project.
- o Guided a small cross-functional team (3–5 members), ensuring on-time delivery and high performance.
- o Achieved feature completion ahead of schedule with a 20% increase in page load speed over baseline.
- o Implemented responsive UI/UX, optimized for SEO and performance, resulting in a 30% improvement in mobile accessibility scores.
- o Coordinated project management using tools like Trello and Git, fostering team collaboration and efficiency.

FULL STACK JAVA TRAINEE | Test Yantra

Dec 2025 - March 2026

- o Completed structured training in SQL covering DDL, DML, DQL, and TCL operations for effective database management.
 - o Enhanced proficiency in writing streamlined SQL queries, including joins, subqueries, and data manipulation techniques.
 - o Worked with PL/SQL concepts such as stored procedures, functions, and basic triggers for database logic implementation.
 - o Gained strong knowledge of Core Java, including Object-Oriented Programming concepts such as inheritance, polymorphism, abstraction, and encapsulation.
 - o Applied Java concepts like type casting, object binding, loops, conditional statements, and exception handling to build structured and efficient programs.
-

PROJECTS

FREE2SPEAK NEWS BROADCASTING WEBSITE

May 2025 - July 2025

- o Developed and deployed a responsive news broadcasting website using HTML, CSS, JavaScript, and PHP.
- o Enhanced backend integration, achieving 20% faster page load and 30% better mobile accessibility.
- o Managed a cross-functional 4-member team using Trello and Git, ensuring on-time delivery.
- o Improved SEO and performance through effective caching and content optimization.

LORA IN DEFENCE: A SECURE & RESILIENT COMMUNICATION MODEL FOR MODERN THREATS (HACKATHON) Sept 2025

- o Designed and enhanced an IoT-based Soldier Health Monitoring System to track real-time vitals such as heart rate, temperature, and location.
- o Applied LoRa (Long Range) communication protocol enabling secure, long-distance data transmission independent of internet and traditional radio frequency networks.
- o Integrated SOS alert mechanism for emergency situations, ensuring instant distress signalling to command centres.
- o Built a low-power, reliable hardware model improved for field conditions and continuous military operation.
- o Focused on scalability and interoperability, making the system adaptable for various defence and rescue applications.

SPAM DETECTION SYSTEM

Sept 2025 – Nov 2025

- o Built a machine learning model using Python and scikit-learn to classify messages as spam or not.
- o Used TF-IDF vectorization and Naive Bayes algorithm achieving 95% accuracy.
- o Developed a simple Flask-based frontend for real-time message classification.
- o Implemented model persistence using pickle for deployment.

- Developed a fair and unbiased food ordering application inspired by Swiggy and Zomato to support small food vendors and local food stalls through equal platform visibility.
- Designed and enforced a review-independent ordering system that minimizes customer bias toward highly rated restaurants and promotes equal business opportunities for all vendors.
- Worked as a Front-End Developer and Java Backend Engineer to build responsive user interfaces, implement backend business logic, and develop features including order processing, vendor management, and delivery workflow functionalities.
- Enhanced and managed the backend database system using SQL to ensure secure data handling, efficient order tracking, optimized performance, and smooth real-time application operations.
- Gained hands-on experience in Java, Front-End Development, Backend Development, Database Management, RESTful APIs, Team Collaboration, Problem Solving, System Design, and Real-Time Application Development while building a scalable and reliable food delivery platform.

EDUCATION

Vignan Institute of Technology and Management (VITAM)	Berhampur, India
B. Tech in Computer Science Engineering	Nov 2022 – May 2026
Khallikote Higher Secondary School	Berhampur, India
Higher Secondary Education	Dec 2020 - June 2022
Guru Nanak Public School	Berhampur, India
Secondary Education	June 2007 - March 2020

SKILLS SUMMARY

TECHNICAL SKILLS

- **Backend:** DSA, Core Java, Spring Boot, Hibernate.
- **Frontend:** HTML5, CSS3, Bootstrap, React.js
- **Tools:** VS Code, Eclipse, SQL Plus, GitHub.
- **Databases:** MySQL, PL-SQL, Oracle SQL, JDBC.

SOFT SKILLS

- Communication, Leadership, Problem Solving, Team Collaboration
- Frequent in: English, Hindi, Odia (Mother Tongue).

CERTIFICATES

MSC HIRETECH	Certificate of Completion: Software Development Intern	Jan 2025
IBM (Coursera)	Programming in Python for Data Science, AI, and Development	June 2025
IBM (Coursera)	Introduction to Data Science	June 2025
Deloitte (Forage)	Data Analytics Job Simulation: Forensic Technology	July 2025
NMIET, BBS	LoRa Model for IAF – NexTech 1.0 Hackathon	Sept 2025
J SPIDERS	Completion of Full Stack Java Training	March 2026
